PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Pat Kennedy
DOCKET NO.: 03-20240.001-R-1
PARCEL NO.: 05-29-307-011

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Pat Kennedy, the appellant, by attorney Mitchell L. Klein with the law firm of Schiller, Klein & McElroy in Chicago and the Cook County Board of Review.

The subject property consists of 38,856 square foot parcel of land containing a 69-year old, two-story, frame and masonry, single-family dwelling. The improvement contains 8,363 square feet of living area, six and one-half baths, four fireplaces and a full, unfinished basement. The appellant, via counsel, argued that there was unequal treatment in the assessment process of the improvement as the basis of this appeal.

In support of the equity argument, the appellant submitted assessment data and descriptions of four properties suggested as comparable to the subject. A brief from the appellant's attorney were also submitted. The data in its entirety reflects that the properties are located within the subject's neighborhood and are improved with a two-story, masonry or frame and masonry, single-family dwelling with between two and one-half and six and three-half baths. The improvements range: in age from five to 74 years; in size from 5,664 to 7,575 square feet of living area; and in improvement assessments from \$6.61 to \$12.22 per square foot of living area. The properties have one, two or three

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds $\underline{no\ change}$ in the assessment of the property as established by the $\underline{\mathbf{Cook}}$ County Board of Review is warranted. The correct assessed valuation of the property is:

fireplaces. No basement information was provided. Based upon this analysis, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$103,113, or \$12.33 per square feet of living area. The board also submitted copies of the property characteristic printouts for the subject as well as four suggested comparables located within four blocks of the subject. The board's properties contain a two-story, frame or frame and masonry, single-family dwelling with three, three and two-half or four and one-half baths, air conditioning, two, three or four fireplaces, and a partial or full basement with one finished. The improvements range: in age from one to 74 years; in size from 4,166 to 6,719 square feet of living area; and in improvement assessments from \$13.90 to \$16.94 per square foot of living area. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the testimony and reviewing the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent of inequities pattern assessment within the assessment Proof of assessment inequity should include jurisdiction. assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. Property Tax Appeal Board Rule 1910.65(b). Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has not met this burden and that a reduction is not warranted.

The parties presented assessment data on a total of eight equity comparables. The PTAB finds that the appellant's comparables #1, $\sharp 2$ and $\sharp 4$ and the board of review's comparables $\sharp 1$ and $\sharp 3$ are similar to the subject. These five comparables contain a twomasonry or frame and masonry, single-family story, frame, located within the subject's neighborhood. dwelling improvements range: in age from 48 to 74 years; in size from 5,309 to 7,362 square feet of living area; and in improvement assessments from \$6.61 to \$16.94 per square foot of living area. In comparison, the subject's improvement assessment of \$12.33 per Docket No. 03-20240.001-R-1

square foot of living area falls within the range established by these comparables. The PTAB accorded less weight to the remaining properties due to a disparity in size and/or age.

As a result of this analysis, the PTAB further finds that the appellant has not adequately demonstrated that the subject's improvement was inequitably assessed by clear and convincing evidence and that a reduction is not warranted.
