

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Cary Perlman  
DOCKET NO.: 03-30510.001-R-1  
PARCEL NO.: 14-33-305-075  
Township: North

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Cary Perlman, the appellant, by Attorney Arnold G. Siegel in Chicago and the Cook County Board of Review.

The subject property consists of a 3,030 square foot parcel of land containing a seven year old, 3,872 square foot, three-story, masonry, single-family residence with three baths, two fireplaces and air conditioning. The appellant, via counsel, argued that there was unequal treatment in the assessment process of the improvement as the basis of this appeal.

In support of the equity argument, the appellant submitted assessment data and descriptions of six properties suggested as comparable to the subject. A black and white photograph of the subject property as well as a brief from the appellant's attorney was also included. The data of the suggested comparables reflects that the properties are located within three and one-half blocks of the subject and improved with a two or three-story, masonry, single-family dwelling with two and one-half or three and one-half baths, air conditioning, between one and three fireplaces, and, for one property, a full, unfinished basement. Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds a reduction in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 15,513  
IMPR.: \$ 94,477  
TOTAL: \$109,990

Subject only to the State multiplier as applicable.

improvements range: in age from 16 to 58 years; in size from 3,350 to 4,026 square feet of living area; and in improvement assessments from \$14.54 to \$25.07 per square foot of living area. Based upon this analysis, the appellants requested a reduction in the subject's improvement assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$136,987, or \$35.38 per square foot of living area. The board also submitted copies of the property characteristic printouts for the subject as well as two suggested comparables with all the properties located within the subject's neighborhood. The board's properties contain a three-story, masonry, single-family dwelling with three baths, air conditioning, two or three fireplaces, and, for one property, a full, finished basement. The improvements are seven and 12 years old, contain 3,595 and 2,446 square feet of living area and have improvement assessment of \$37.32 and \$36.18 per square foot of living area. In addition, the board submitted copies of its file from the board of review's level appeal. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the evidence and reviewing the record, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. Proof of assessment inequity should include assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. *Property Tax Appeal Board Rule 1910.65(b)*. Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has met this burden and that a reduction is warranted.

Both parties presented assessment data on a total of eight equity comparables. The PTAB finds the appellant's comparables #2, #3 and #5 are the most similar to the subject. These three comparables contain a two or three-story, masonry, single-family dwelling located within two blocks of the subject. The improvements are 16 years old and range in size from 3,684 to 3,747 square feet of living area; and in improvement assessment

from \$22.72 to \$25.07 per square foot of living area. In comparison, the subject's improvement assessment of \$35.37 per square foot of living area falls above the range established by these comparables. The PTAB accorded less weight to the remaining properties due to a disparity in size.

As a result of this analysis, the PTAB further finds that the appellant has adequately demonstrated that the subject's dwelling was inequitably assessed by clear and convincing evidence and that a reduction is warranted.
