

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Jamal Ahmad
DOCKET NO.: 12-27367.001-R-1
PARCEL NO.: 27-14-404-020-0000

The parties of record before the Property Tax Appeal Board are Jamal Ahmad, the appellant, by attorney Timothy E. Moran, of Schmidt Salzman & Moran, Ltd in Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented in this matter, the Property Tax Appeal Board hereby finds **No Change** in the assessment of the property as established by the **Cook** County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$6,305
IMPR.: \$21,494
TOTAL: \$27,799

Subject only to the State multiplier as applicable.

Statement of Jurisdiction

The appellant timely filed the appeal from a decision of the Cook County Board of Review pursuant to section 16-160 of the Property Tax Code (35 ILCS 200/16-160) challenging the assessment for the 2012 tax year. The Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of the appeal.

Findings of Fact

The subject property consists of a multi-level style dwelling of frame and masonry exterior construction with 1,914 square feet of living area. The dwelling is approximately 33 years old. Features of the home include a partial finished basement, central air conditioning, a fireplace, and a two-car garage. The property has a 14,012 square foot site and is located in Orland Park, Orland Township, Cook County. The subject is classified as a class 2-34 property under the Cook County Real Property Assessment Classification Ordinance.

The appellant contends assessment inequity as the basis of the appeal. In support of this argument the appellant submitted information on five equity comparables with the same neighborhood assessment code as the subject property. The comparables are improved with multi-level style dwellings of frame and masonry or masonry exterior construction that range from 35 to 40 years old. The comparables had features of varying degrees of similarity when

compared to the subject. The dwellings range in size from 1,980 to 2,286 square feet of living area and have improvement assessments ranging from \$15,108 to \$21,686 or what appears to be \$73.13 to \$102.42¹ per square foot of living area. Based on this evidence, the appellant requested the total assessment be reduced to \$24,385.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the total assessment for the subject of \$27,799. The subject property has an improvement assessment of \$21,494 or \$11.23 per square foot of living area. In support of its contention of the correct assessment the board of review submitted information on four equity comparables located in the same block or within .25 of a mile from the subject property. The comparables are improved with multi-level style dwellings of frame and masonry exterior construction that are 29 or 33 years old. The comparables had features of varying degrees of similarity when compared to the subject. The dwellings range in size from 1,981 to 2,144 square feet of living area and have improvement assessments that range from \$23,030 to \$24,068 or from \$11.23 to \$11.90 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

Conclusion of Law

The taxpayer contends assessment inequity as the basis of the appeal. When unequal treatment in the assessment process is the basis of the appeal, the inequity of the assessments must be proved by clear and convincing evidence. 86 Ill.Admin.Code §1910.63(e). Proof of unequal treatment in the assessment process should consist of documentation of the assessments for the assessment year in question of not less than three comparable properties showing the similarity, proximity and lack of distinguishing characteristics of the assessment comparables to the subject property. 86 Ill.Admin.Code §1910.65(b). The Board finds the appellant did not meet this burden of proof and a reduction in the subject's assessment is not warranted.

The parties submitted information on a total of nine suggested equity comparables for the Board's consideration. The Board gave less weight to the appellant's comparables due to the lack of descriptive information about the basement which prevents a meaningful analysis to determine the similarities of comparables to the subject property. The Board finds the board of review's comparables are similar when compared to the subject in location, age, dwelling size, design, exterior construction and features. These comparables had improvement assessments that ranged from \$11.23 to \$11.90 per square foot of living area. The subject's improvement assessment of \$11.23 per square foot of living is supported by the best comparables in this record. Based on this record the Board finds the appellant did not demonstrate with clear and convincing evidence that the subject's improvement was inequitably assessed and a reduction in the subject's assessment is not justified.

¹ The appellant's assessment grid analysis appears to depict the appellant misplaced the decimal when computing the assessment per square foot value. The correct assessment per square foot value range is \$7.31 to \$10.24.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
