Statement of Jurisdiction

The appellant timely filed the appeal pursuant to section 16-160 of the Property Tax Code (35 ILCS 200/16-160) after receiving a decision from the Cook County Board of Review. The instant appeal challenges the assessment for tax year 2018. The Property Tax Appeal Board (the "Board") finds that it has jurisdiction over the parties and the subject matter of this appeal.

Findings of Fact

The subject consists of 11 condominium units with a 91.83% total ownership interest in the common elements. The property is located in Jefferson Township, Cook County. The subject units are all classified as a class 2-99 property under the Cook County Real Property Assessment

Classification Ordinance. No evidence was submitted as to whether any of the subject units are owner-occupied.

The appellant contends overvaluation as the basis of the appeal. In support of this argument, the appellant submitted a condominium analysis showing that two units in the subject's building, or 16.23% of ownership in the common elements, sold between September 2015 and October 2017 for an aggregate price of \$215,900. This analysis included one of the subject units. The appellant deducted 5.00% from the aggregate sale price to account for personal property. The condominium analysis also included separate appraisals for each of the subject units. The first appraisal was for the unit with the PIN ending in -1005, and estimated that this unit had a market value of \$85,000 as of July 9, 2015. The second appraisal was for the unit with the PIN ending in -1007, and estimated that this unit had a market value of \$98,000 as of July 9, 2015. The two market value conclusions from each of the appraisal were added to the two aggregate sales price, less the personal property deduction, and the sum was then divided by the combined percentage of ownership interest in the common elements of the units sold and the units appraiser to arrive at a total market value for the building of \$1,097,582. Based on this evidence, the appellant requested a reduction in the subject's assessment to \$100,828.

The board of review submitted its "Board of Review Notes on Appeal" disclosing that the total assessment for the subject is \$145,162. The subject's assessment reflects a market value of \$1,451,620 when applying the 2018 statutory level of assessment for class 2 property of 10.00% under the Cook County Real Property Assessment Classification Ordinance.

In support of its contention of the correct assessment the board of review submitted a condominium analysis showing that one unit in the subject's building, or 8.16% of ownership in the common elements, sold in October 2017 for a price of \$129,000. The board of review deducted 1.00% from the aggregate sale price to account for personal property. The aggregate sales price, less the personal property deduction, was then divided by the percentage of ownership interest in the common elements of the unit sold to arrive at a total market value for the building of \$1,565,073.

Conclusion of Law

The appellant contends the market value of the subject property is not accurately reflected in its assessed valuation. When market value is the basis of the appeal, the value of the property must be proven by a preponderance of the evidence. 86 Ill.Admin.Code §1910.63(e). Proof of market value may consist of an appraisal of the subject property, a recent sale, comparable sales, or construction costs. 86 Ill.Admin.Code §1910.65(c). The Board finds the appellant did meet this burden of proof, and a reduction in the subject's assessment is warranted.

"Real property taxes . . . which are authorized by law to be assessed against and levied upon real property shall be assessed against and levied upon each unit and the owner's corresponding percentage of ownership in the common elements as a tract, and not upon the property as a whole." 765 ILCS 605/10(a).

The Board finds the best evidence of market value to be all of the sale comparables submitted by the parties, plus the estimates of market value found in the two appraisals. In taking the

aggregate market values found in both the appraisals and the sale comparables (\$398,900) and dividing by the total percentage of ownership in the common elements of those units (35.36%), the Board finds that the subject's building has a market value of \$1,128,111. Multiplying this market value by the subject's percentage of ownership in the common elements of 91.83% results in a market value for the subject of \$1,035,944. The subject's current assessment reflects a market value above the market value established by the best comparables in this record. The Board further finds that there was no evidence submitted to show that personal property was included in any of the sale transactions, and that no deduction is warranted for this factor. Based on this record, the Board finds the appellant has proven, by a preponderance of the evidence, that the subject is overvalued, and that a reduction in the subject's assessment is warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code. Pursuant to Section 1910.50(d) of the rules of the Property Tax Appeal Board (86 Ill.Admin.Code §1910.50(d)) the proceeding before the Property Tax Appeal Board is terminated when the decision is rendered. The Property Tax Appeal Board does not require any motion or request for reconsideration.
