FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD

APPELLANT: Alexander Frehse
DOCKET NO.: 24-53648.001-R-1
PARCEL NO.: 17-22-307-066-0000

The parties of record before the Property Tax Appeal Board are Alexander Frehse, the appellant, by attorney Michael R. O'Malley, of Schmidt Salzman & Moran, Ltd. in Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented in this matter, the Property Tax Appeal Board hereby finds ***No Change*** in the assessment of the property as established by the **Cook** County Board of Review is warranted. The correct assessed valuation of the property is:

LAND:	$19,175
IMPR.:	$66,825
TOTAL:	$86,000

Subject only to the State multiplier as applicable.

Statement of Jurisdiction

The appellant timely filed the appeal from a decision of the Cook County Board of Review pursuant to section 16-160 of the Property Tax Code (35 ILCS 200/16-160) challenging the assessment for the 2024 tax year. The Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of the appeal.

Findings of Fact

The subject property consists of a 3-story dwelling of masonry exterior construction with 2,552 square feet of living area. The dwelling is approximately 23 years old. Features of the home include a slab foundation, central air conditioning, a fireplace, and a 1.5-car garage. The property has a 1,102 square foot site and is located in Chicago, South Chicago Township, Cook County. The subject is classified as a class 2-95 townhome or row house property under the Cook County Real Property Assessment Classification Ordinance.

The appellant contends assessment inequity with respect to the improvement as the basis of the appeal. In support of this argument the appellant submitted information, including property characteristics printouts that were used by the Board to verify or correct some of the data in the grid analysis, on five equity comparables. The properties are located within the subject's assessment neighborhood, and the appellant's grid analysis reported "Unknown" for the

comparables' proximity to the subject. The comparables consist of class 2-95, 3-story dwellings of masonry exterior construction ranging in size from 2,310 to 2,625 square feet of living area. The dwellings are 20 or 22 years old. According to the property characteristics printouts, the comparables have slab foundations. Each comparable has central air conditioning, a fireplace, and a 1-car garage. The comparables have improvement assessments that range from $45,232 to $54,621 or from $19.12 to $20.88 per square foot of living area. Based on this evidence, the appellant requested the subject's improvement assessment be reduced.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject property has a total assessment of $86,000. The subject property has an improvement assessment of $66,825 or $26.19 per square foot of living area.

In support of its contention of the correct assessment the board of review submitted information on two grid analyses, each containing four comparables numbered #1 through #4. For clarity in the record, the comparables in the second grid with 23-year-old dwellings have been renumbered in consecutive order as comparables #5 through #8. All the comparables are located within the subject's assessment neighborhood, and comparables #1 through #4 are also located within the same block and street as the subject. The eight comparables consist of class 2-95, 3-story dwellings of masonry exterior construction with comparables #1 through #4 each containing 2,552 square feet of living area and comparables #5 through #8 containing from 2,247 to 2,294 square feet of living area. The comparables are 22 or 23 years old. Six comparables each have a slab foundation, and comparables #5 and #6 each have a basement. All the comparables have central air conditioning, a fireplace, and either a 1.5-car or a 2-car garage. The board of review provided notations indicating the board of review's comparables #1 through #4 are located within subject's development while the appellant's comparables and board of review's comparables #5 through #8 are located outside the subject's development. The eight comparables have improvement assessments ranging from $59,322 to $66,825 or from $26.19 to $28.48 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

Conclusion of Law

The appellant contends assessment inequity as the basis of the appeal. When unequal treatment in the assessment process is the basis of the appeal, the inequity of the assessments must be proved by clear and convincing evidence. 86 Ill.Admin.Code §1910.63(e). Proof of unequal treatment in the assessment process should consist of documentation of the assessments for the assessment year in question of not less than three comparable properties showing the similarity, proximity and lack of distinguishing characteristics of the assessment comparables to the subject property. 86 Ill.Admin.Code §1910.65(b). The Board finds the appellant did not meet this burden of proof and a reduction in the subject's assessment is not warranted.

The record contains a total of thirteen comparables for the Board's consideration. The Board gives less weight to the appellant's comparables and the board of review's comparables #5 through #8 which are located outside the subject's development and are also less similar to the subject in dwelling size, foundation type and/or garage capacity than the board of review's comparables which are located within the subject's development and are identical to the subject in overall property characteristics.

The Board finds the best evidence of assessment equity to be the board of review's comparables #1 through #4 which are located within the same assessment neighborhood, block and street as the subject and are also identical or nearly identical to the subject in design, age, dwelling size, bathroom count, basement foundation and other features. The subject's improvement assessment of $66,825 or $26.19 per square foot of living area is equal to the improvement assessment of the four best comparables in this record. Based on this record, the Board finds the appellant did not demonstrate with clear and convincing evidence that the subject's improvement was inequitably assessed and a reduction in the subject's assessment is not justified.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code. Pursuant to Section 1910.50(d) of the rules of the Property Tax Appeal Board (86 Ill.Admin.Code §1910.50(d)) the proceeding before the Property Tax Appeal Board is terminated when the decision is rendered. The Property Tax Appeal Board does not require any motion or request for reconsideration.
